

# 3 Easy Steps for an Online Quotation

## **Step 1**

### **Photographs**

I need to learn about your home and fireplace through photographs. Please send me photographs of your existing fireplace and, if possible, a photograph up the chimney.

Take a photo of your house so I can see the whole chimney breast and chimney pot.

## **Step 2**

### **Measurements**

Take measurements of your fireplace opening - width, height and depth What is the width and depth of your chimney breast (whether it is internal or external)?

Can you estimate the rough size of your room? Width, depth and height

## **Step 3**

### **Your dream fireplace?**

Send pictures if you have an idea of what you would like your new fireplace to look like? I will suggest a selection of stoves which I feel match your brief.

Tell me if you have any preference to the finish of your new hearth i.e. granite, slate, marble. Also, tell me if you want a stone surround, a beam – or neither.
